

## Make-to-Stock Manufacturing

Enavate Make to Stock Manufacturing, powered by Microsoft Dynamics 365 Business Central, serves as the backbone of your MTS business. Through a world-class solution combining ERP, advanced analytics, and Artificial Intelligence driven insights, we empower operators to make informed decisions, optimize resource utilization, and enhance overall efficiency ensuring products are readily available for your customers.

### Overcome common challenges with Enavate Make-to-Stock Manufacturing:

#### **Confusion, mistakes, and delays in manufacturing due to lack of visibility into sales orders, engineering, production, and purchasing**

Enavate Make-to-Stock Manufacturing starts with Business Central as a holistic ERP system ensuring end-to-end process integration through a centralized platform. This eliminates silos in manufacturing, inventory, procurement, and financial processes, providing real-time visibility into operations and fostering greater efficiency and collaboration.

#### **Poor forecasting and complicated planning and scheduling that results in delays, higher costs, and lower productivity**

AI-powered advanced reporting tools combined with Business Central's comprehensive planning and scheduling tools analyze vast amounts of data quickly and efficiently. Operators gain deeper insights, make data-driven decisions, and drive operational improvement.

#### **Manual data entry leading to accuracy issues**

Utilize the full capabilities of Business Central while providing smaller, purpose-built applications for efficient data entry and workflow via Power Platform. This powerful combination eliminates manual data entry, improving data accuracy by providing comprehensive integration services and automation capabilities.

#### **Inventory issues that delay orders, leading to unhappy clients and harm to your reputation**

By leveraging Business Central, you utilize real-time data and demand forecasting to maintain optimal inventory levels and prevent stockouts on raw materials and finished goods; helping meet customer demands promptly and improve client satisfaction.

## CONNECTED CAPABILITIES TO ELEVATE MANUFACTURING OPERATIONS

Enavate Make to Stock Manufacturing is powered by Microsoft Dynamics 365 Business Central, ensuring a robust, reliable, and scalable ERP platform for your manufacturing needs.

Assembly Management

Capacity Planning

Version Management

Standard Cost Worksheet

Machine Centers

Subcontracting

Scrap

Our integration strategy with specialized MTS platforms transforms complex data landscapes into a streamlined, centralized hub. This real-time access to data powers significant improvements:

### STREAMLINED OPERATIONS

Accelerate processes and reduce redundancies for quicker, more efficient workflows

### OPTIMIZED RESOURCE UTILIZATION

Allocate resources more effectively, ensuring optimal use of equipment, personnel, and time

### ENHANCED ORGANIZATIONAL EFFICIENCY

Elevate overall productivity through smarter, data-driven decision-making

## ENAVATE MANUFACTURING EXPERTISE

At Enavate, we're more than just a software provider – we're a trusted partner of leading manufacturers, navigating the complexities of Make-to-Stock manufacturing and delivering results.

### Proven Success with Manufacturing Clients

Trusted by leading manufacturers, showcasing our ability to deliver results. Our strategic partnerships and proprietary integration technology enhance efficiency and support.

### Retention of Specialized Tools and Workflows

Seamlessly integrate without sacrificing the specialized tools and workflows essential to your operations.
